

It's Getting Hot Out There

Law and Policy Strategies to Reduce Health Risks of Extreme Heat

Presented By:

Joanne Pérodin

Vice President of Programs, The CLEO Institute

Caleb Smith

Resiliency Coordinator, WE ACT for Environmental Justice

Moderator: Betsy Lawton, Deputy Director Climate and Health, Network for Public Health Law

Question:

What types of solutions would you like to see implemented to reduce the energy cost burden and /or mitigate heat with a low carbon impact

Question:

What are some critical efforts to move from short-term extreme heat protection measures toward long-term mitigation and adaptation?

Question:

What types of programs and policies can people be organizing around and advocating for on the state level to mitigate extreme heat?

Question:

worldwide problem needs worldwide collab.

Question:

Please take this survey to evaluate conference sessions.
